

Nature Alliance Family Day Care Service

Philosophy

Philosophy

We believe in developmentally appropriate environments. We support Educators in creating high quality nature based environments where children's well-being and involvement are supported allowing them to thrive and develop to their true potential in small individualised settings.

We believe in holistic sustainability. We actively promote sustainable practices within the service.

We believe in natural learning environments. We support Educators in creating opportunities for children to connect with nature within their homes and on regular excursions to natural spaces. We encourage appropriate risk taking and developing resilience as part of the natural play and learning opportunities.

We believe in respectful relationships. We provide a professional service where all stakeholders work together respectfully, share the same high values and expectations.

We believe in skilled, professional Educators. Educators will be encouraged to access regular professional development opportunities allowing them to be aware of current research and best practice. Educators are supported in reflecting on their practice and the intentional teaching in their play based environments.

We believe in valuing the roles of parents, families and the community. We respect, support and celebrate the equity, inclusion and diversity within all cultures and actively promote Australian Aboriginal and Torres Strait Islander perspectives.

Vision

To create a professional sector leading service where children, families and educators are valued and respected.

Mission

To support Educators in building a successful, financially secure business while providing an environment that recognises children as capable and competent individuals where learning and the rights of the child are central to the program.
